

# Autonomous Navigation and Perception via Deep Learning

In this project we shall investigate approaches to address autonomous navigation and perception in unknown environments via deep learning. Specific project objectives will be determined together with the student(s).

## Contact details:

Asst. Prof. Vadim Indelman: [vadim.indelman@technion.ac.il](mailto:vadim.indelman@technion.ac.il)

**Prerequisites:** programming skills (preferably Python or C++). Background in machine (deep) learning is an advantage.
